

LARS150

Portable Sound Enhancement Loudspeaker

Description

LARS150 is an active special acoustic hailing device. It adopts voice coil air cooling technology for fast cooling, with the high power over 500W. Compared with common acoustic devices, its maximum sound pressure level is 10dB higher, greatly enhancing the sound transmission distance. Moreover, for paging, you can use its handheld microphone or by the Bluetooth of mobile phones or other third party software. Besides, it has one key to play the alarm and one key to play the dispel sound.

In conclusion, this product is compact in size, powerful in function, and beautiful in appearance.

Features

- Adopts voice coil air cooling technology, cooling fast
