

LRAD1930A

Active Acoustic Hailing Device

Description

As a typical non-lethal weapon, this product is not restricted by international conventions and does not cause adverse international political influence. It is widely used in anti-terrorism and stability maintenance, such as handling mass events, including illegal gatherings, riots, and insurrections, regional vigilance, maritime law enforcement, border protection, and bird dispersal at airports. Therefore, it is of great significance in safeguarding the security of the country and protecting the lives and properties of the people.

Features

- Adopt top-level loudspeaker unit for high sensitivity and high sound pressure level.
- All-weather design, waterproof, moisture-proof and shock-proof.
- When using the device separately, you can call out to the target with the handheld microphone that comes with the device. The device is provided with a USB flash drive, Bluetooth, and unpleasant sound generator.
- With high sound pressure level, this product can achieve long-distance directional transmission of high-intensity sound waves, and stimulate human hearing organs and central nervous system through high-intensity sound pressure to disable or dispel the target, further to refuse and disperse the crowd without producing permanent harm. Also, it can carry out long-range broadcasting, publicity and warning to the crowd.

Specifications

Model	LRAD1930A
Rated Power	1300W
Speech Intelligibility	≥0.8@100m
Maximum Sound Pressure Level	155±2dB
Effective Frequency Range	500Hz~5kHz
Coverage Angle	30° (H)×30° (V) @2000Hz
Product Dimensions (W×D×H)	890mm×810mm×280mm
Package Dimensions (W×D×H)	1000mm×950mm×430mm (100mm high without wheels)
Net Weight	72kg
